DISCUSSION ITEMS

Our wells the John Hardy North and John Hardy South were the main topics of discussion. The Las Vegas Valley Water District assumed operation of Blue Diamond water from the wells in 1992. It was presented how the water arrives to the aquifer. The level of the wells is directly related to the rate of precipitation. The water is tested monthly and our water is excellent.

There were presentations in regards to water usage. The 4 main players are the Gypsum Mine, James Hardy Gypsum Plant, Blue Diamond and the water trucks (from the Gypsum Mine). All are using water well within their yearly allotments. For example Blue Diamond is allotted 150 acre feet of water per year and last year used 130 acre feet.

There was discussion in regards to our gratitude for the Nevada State Hydrologist who helped in getting repairs made to the "Arden Pipeline". It's been reported there is a higher water flow coming from our Spring into the park.
